

COVER LETTER

Personal Dataset — Ikram Wazir

General Internship Letter

Dear Hiring Manager,

I am Ikram Wazir, a BS Artificial Intelligence student at the University of Management and Technology (UMT), Lahore, with an academic focus on Python, machine learning, deep learning and natural language processing. I am seeking an AI or Machine Learning internship where I can apply my academic knowledge to practical problems and continue developing my engineering skills.

My project work includes an AI-Powered Resume Screening System using TF-IDF, LinearSVC, LabelEncoder and cosine similarity, with document processing, Gmail integration and a Streamlit interface. I have also worked with FastF1 and predictive modeling for a Formula 1 data-warehouse project and am developing a personal-data collection project for an NLP RAG chatbot.

I am particularly interested in practical AI systems, Generative AI, RAG, NLP and software-based solutions. I would welcome the opportunity to learn from an experienced team, contribute to real projects and strengthen my skills through hands-on work.

Thank you for considering my application. Sincerely, Ikram Wazir.
