

GOALS & FUTURE PLANS

Personal Dataset — Ikram Wazir

Current Direction

- Build an AI career.
- Strengthen Python, Machine Learning and Deep Learning.
- Develop practical AI systems.
- Grow into Generative AI and RAG.
- Build a professional project portfolio.
- Develop Ikrambot as a personal-data/RAG project.

Short-Term Career

- Seek an AI/Machine Learning internship after focused learning.

Historical Summer Plan

- Approx. 20 July–1 October: Python + ML + DL only; NLP excluded because it was a university summer course.

FYP Direction

- Software-based, minimum hardware, AI-driven, innovative, real-world Pakistani problem and startup-like potential.
- Earlier AI virtual try-on mirror interest was reduced because similar projects appeared common/taken.
- Later preference moved away from security, IoT and medical FYPs.

Longer-Term Interests

- AI software engineering; NLP; Generative AI/RAG; practical AI products; entrepreneurship; continued robotics/embedded and SDR experimentation.

Status Note

- Plans are recorded as plans, not completed achievements. Semester-specific plans may change.
